EDUCATION

University of Arizona, College of Science **Tucson, Arizona**
Bachelor of Science Expected Graduation: December 2026
Major: Computer Science **GPA:** 3.5

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java, C, MongoDB
Backend: Django/FastAPI, Node.js
Tools: Git, Jira, Excel

PROFESSIONAL EXPERIENCE

TTLK **Tucson, Arizona**
Co-Founder August 2025 - Present

- Built end-to-end product features for smart sizing and virtual try-on workflows, translating customer input into decision-ready fit recommendations.
- Designed and iterated on backend data models and API contracts to support core workflow capabilities (product ingestion, user sessions, saved results, and internal review views).
- Integrated LLM-assisted extraction/summarization for unstructured brand inputs (product descriptions, sizing charts, customer feedback), prioritizing reliability with retries, structured outputs, and basic guardrails.
- Partnered with product and operations stakeholders to ship weekly iterations and measure impact through conversion/return-related metrics.

Aquaculture Pathology Lab **Tucson, Arizona**
Administrative Student Intern May 2025 – Present

- Improved internal operations workflows by building Excel dashboards and automated reporting pipelines, reducing manual processing by ~10 hours/week.
- Maintained and improved structured lab data systems with a focus on data accuracy, traceability, and fast retrieval for staff.
- Provided technical support and troubleshooting, resolving ~5 issues/week with clear documentation and repeatable fixes.

OYStartech LLC **Tashkent, Uzbekistan**
Backend Developer Intern June 2024 – August 2024

- Built end-to-end backend functionality using FastAPI + MongoDB, including data models and REST endpoints to power a product catalog of 500+ items.
- Designed and implemented backend endpoints and database schemas to improve data access patterns and enable workflow features like filtering, pagination, and fast lookup.
- Worked with a development team to follow policy requirements and using Agile methodologies to ensure timely project delivery.

LEADERSHIP EXPERIENCE

Department of Computer Science **Tucson, Arizona**
Undergraduate Teaching Assistant January 2025 – December 2025

- Supported student success through debugging help, code reviews, and clear explanations of algorithms and systems concepts during office hours and labs.
- Collaborated with instructors to deliver labs smoothly and communicate recurring issues and improvements.
- Acted as a bridge between students and faculty by gathering feedback and supporting orientations and workshops.
